Work

Fynd

July – November 2024, Mumbai

Product Design Intern

- Conducted 3-week structured research (onboarding UX, competitive analysis, on-site warehouse observation) to inform strategy for enterprise warehouse management system.
- Performed observational research at operational warehouse facility, documenting worker behaviors and workflows.
- Analyzed competitive landscape across enterprise platforms, identifying onboarding friction and self-serve gaps.
- Synthesized research findings into insights that shaped 10-week prototype for self-serve onboarding system.
- Collaborated with product team to translate research into user-centered design decisions throughout project lifecycle.

Valuelabs

March 2021 – October 2022, Remote

Design Strategist

- Conducted stakeholder interviews and requirements research for web, mobile, and software projects across finance, travel, supply chain, and pharmaceutical domains.
- Led generative research to identify pain points and synthesize business, domain, and user requirements into actionable design briefs.
- Synthesized research into personas, journey maps, and architectures that informed product strategy decisions.
- Presented research insights and strategic recommendations to clients and internal teams.
- Collaborated with designers to ensure research informed design decisions throughout entire project lifecycle.

Interaction Designer

- Conducted in-depth mixed-methods research across finance, travel, and pharmaceutical domains using interviews, surveys, and secondary research.
- Synthesized findings into personas, journey maps, and architectures that informed product strategy and design direction.
- Created wireframes and prototypes validated through stakeholder collaboration and role-playing exercises.
- Conducted structured interviews and evaluations for apprentice hiring, contributing to team research capabilities.

Design Happens

October 2017 - March 2018, Pune

Graphic Design Intern

- Executed mixed-methods research (secondary research, interviews) for final-year project researching family-focused board game design, including multi-stakeholder research with families, children, teachers and psychologists.
- Conducted competitive research and brand positioning studies for premium manufacturing clients across diverse industries.
- Delivered research-backed strategic brand identity proposals for multiple clients based on market analysis.

Education

2019 - 2020

Harbour.Space University

M.A. in Interaction Design

2014 - 2018

Symbiosis Institute of Design

B.Des in Graphic Design

Skills

Research

In-depth interviews, surveys, usability testing, affinity mapping, journey mapping, competitive analysis, heuristic evaluation

Design

Information Architecture, Interaction Design, Wireframing, Prototyping

Collaboration & Strategy

Service Design Thinking, Stakeholder Management, Project Planning, Cross-Functional Collaboration

Tools & Code

Figma, Adobe XD, Illustrator, Photoshop, Miro, Notion, Jira, HTML, CSS, JavaScript

Languages

Marathi (Native), Hindi (Fluent), English (Fluent), German — A2 Certified | Currently Preparing For B1

Recognition

Best Research-Based Report — Symbiosis Design Showcase, 2018
